

The Friends of Archer Park Rail Museum, Rockhampton Queensland

Citra Billard Locotractor

This French-built locotractor (T75P 227, 1948) was donated by Citra Constructions, who operated it as their #11E2. It sat in the Rockhampton City Council's storage yard for several years before being restored by Queensland Rail's Rockhampton Workshop in 1998.

Billard locotracors were also used during QR's electrification projects. At Archer Park the locotractor is used for shunting locomotives and rollingstock, and can often be seen shunting the tram, etc., before and after the Sunday Steam Tram operations.

Running around the station precinct, April 2003. [Iz 7956]

Shunting the tram in the station precinct near Archer Street, August 2008. The white patch near the engine is the interpretive information sheet. [Iz 2157]
